

Vitalliance is a private sector company offering comprehensive business solutions and technology for pharmaceutical supply chains and humanitarian aid organizations. We partner with donors, ministries of health, suppliers, and the private sector, to optimise supply chains across Africa and further afield.

The Vitalliance Approach

Vitalliance offers a unique combination of innovative technology and supply chain expertise. This experience has been gained on the ground in Africa, transforming operations and coaching local teams to proficiency.

Vitalliance's four cornerstones to transform supply chains:

Community

Governance

Innovations

Data

The result:

- ✓ Optimal services
- ✓ Maximum value from funds
- ✓ Better patient outcomes

Supply Chain Services

Engagement models with the right combination of **people, process** and **technology**:

Visibility & Control

What are the root causes of poor performance and how can they be eliminated?

Monitoring
& Improvement

Inventory
Management

Order
Management

Planning & Orchestration

How can we do it best? Make it happen. React faster and smarter.

Supply optimisation

Inventory optimisation

Analytics & Integrated Business Planning

What are the root causes and how can they be eliminated?
How can network-wide synchronization be achieved?
What long-term planning must be considered now?

Analytics & Decision Support

Tactical Planning/S&OP

Enabling Solutions

OpenLMIS Core Software

Vitaliance is the steward of OpenLMIS, an open source, cloud based, electronic logistics management information system (eLMIS) purpose-built to manage health supply chains. OpenLMIS encourages community participation on the shared investment, shared benefit principle. The result is a powerful, flexible system that allows countries to better manage their pharmaceutical supply chain. It allows high levels of configuration and is extensible and inter-operable with other systems.

Open source eLMIS

Track, order and report
stock down to facility level

Community engagement
and contribution

Integration with
One Network

OpenLMIS

One Network

One Network's digital supply chain management solutions provide end-to-end capabilities that work together intelligently and run in the cloud, serving tens of thousands of companies worldwide. It is a network platform that leverages the latest in business technology, including many-to-many networks, AI, machine learning, social networking, big and fast data, block-chain and mobile apps.

Single version of
the truth

Real-time demand and
supply visibility, planning
and execution

Closed
loop system

Multi-party network
